

A Non-intrusive Beamer Theme Focusing on Content

simple theme

Adarsh

July 24, 2017

Why are we building a new theme?

"We want to have a minimal presentation where only content matters."

Short

Write concise sentences.

Simple

Do not complicate things.

Smart

Present ideas in a smart way.

How is this different than others?

Content + Cool Tools = Awesome Presentation

Did you see those cute circles with images?

```
\circleimage[width=2cm]{MyPink}{3cm}{img/awesome}
```

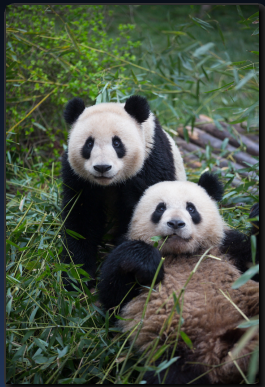

You can get cool clip-arts from <https://openclipart.org>.

Is there more?

We can include images with hint of shadows
(looks better in light theme).

`\shadowimage[scale=0.5]{img/visual}`
and of course `\includegraphics` works too.

Tell me more...

I give you a minimal theme with no clutter. If
you use it wisely then only sky is the limit.

Unleash your **CREATIVITY**

How do I use it?

Include this in your preamble.

```
%\usetheme[style=dark]{simple}  
\usetheme[style=light]{simple}  
% or \usetheme{simple}
```

It comes in two styles –

- Dark Style
- Light Style (Default)

And works like any other theme...

Block

works like a block.

Equations render just fine –

$$A^x + B^y =? \tag{1}$$

and so on so forth.

Can I make changes?

Yes. You can change whatever you want. Mostly, you'd want to change the font. Go to file `beamerinnerthemesimple.sty` and change fonts to the ones you like.

```
\setsansfont{Futura Book}
```

```
\setmonofont{Monaco}
```

You may comment

```
\newfontfamily\futurabold{Futura-Bold}
```

So what is next?

I'd love to hear your thoughts, issues, questions and comments.
